

Your Water Will Love It

**0.2 µm Aquasart® filters cartridges family:
microbiological safety, quickness and sustainability**

Aquasart® membrane filter cartridges are the very last microbiological barrier before water bottling with the highest standard in term of sterile filtration for microbiological security. Build with single or double asymmetrical membranes, Aquasart® cartridges are at the top level in term of flowrate and service life. It gives for the user a potential to increase his bottling speed, less water and energy consumption and reduction of production cost.

Best solutions and services for purest taste.
